

I am running for PWEA president because I feel that we need to return to being a member-driven organization. A true member-driven organization is responsive to its members' concerns; where decisions about our actions and positions come from the members to the leadership – not the other way around. We need **TRANSPARENCY** and **COMMUNICATION** from the ground up and from the top-down. There should be no question of the **VALUE** of your membership.

Ask yourself, “What has the PWEA done for me lately? Who should I turn to if I am in trouble, or if I just have a question?” As a building representative, do you feel prepared to help your members?

I believe that PWEA can do all of these things. I believe in this organization, and I believe in the power of a unified voice – your voice. I believe that together we can make the PWEA be more than it is – it can be the first place to turn when you are looking for professional development, policy clarification, or workplace support.

I’m running for PWEA president because I believe in the PWEA. I believe in what it can do, and I want to serve you, its members.
